

HEAT WAVE HANGOVER

There is a clip on YouTube from the animated show Futurama in which the Neutral President of the Neutral Planet calmly declares, “I have no strong opinion one way or the other.”

Over the past decade, fans of the show have managed to accomplish an oddly impressive yet remarkably mundane feat in order to ensure that the video remains perfectly faithful to its own message.

What is this strangely dedicated accomplishment?

The Henry Stickmin Collection is a choose your own path adventure game developed by Innersloth.

The studio later became famous for another game of theirs, X, which was released years earlier but gained massive popularity in 2020. Initially, there were plans for a sequel to X, but due to the game's success, the developers instead chose to keep expanding the original game with new features and updates.

Identify X?

No one:-

First years to each other:-

AMONG US

In the Hellsing manga, Junior Warrant Officer X serves as a member of Millennium's Werewolf special forces. He resembles a young blond teenager dressed in a Hitler Youth uniform, complete with cat ears and a perpetual smirk. X possesses the power of omnipresence and continues to exist only as long as he believes that he does. This terrifying reality altering ability also grants him regeneration, immortality, and even teleportation powers.

SCHRODINGER

There is a 24 step Procedure to design X with appropriate Dimensions. X is the odd one out from a set of 200.

The following are the initial 5 steps to make the outline:

1. Start off by drawing a line AB of the given length from left to right on the lower portion of a cloth
2. Draw AC perpendicular to AB, making AC equal to $4 \cdot AB/3$. From AC mark off D such that $AD = AB$. Join BD.
3. On BD, mark off E such that $BE = AB$.
4. Draw a line FG parallel to AB through E such that F is on line AC and FG AB.
5. Join CG.

Identify X?

After any event

NEPAL NATIONAL FLAG

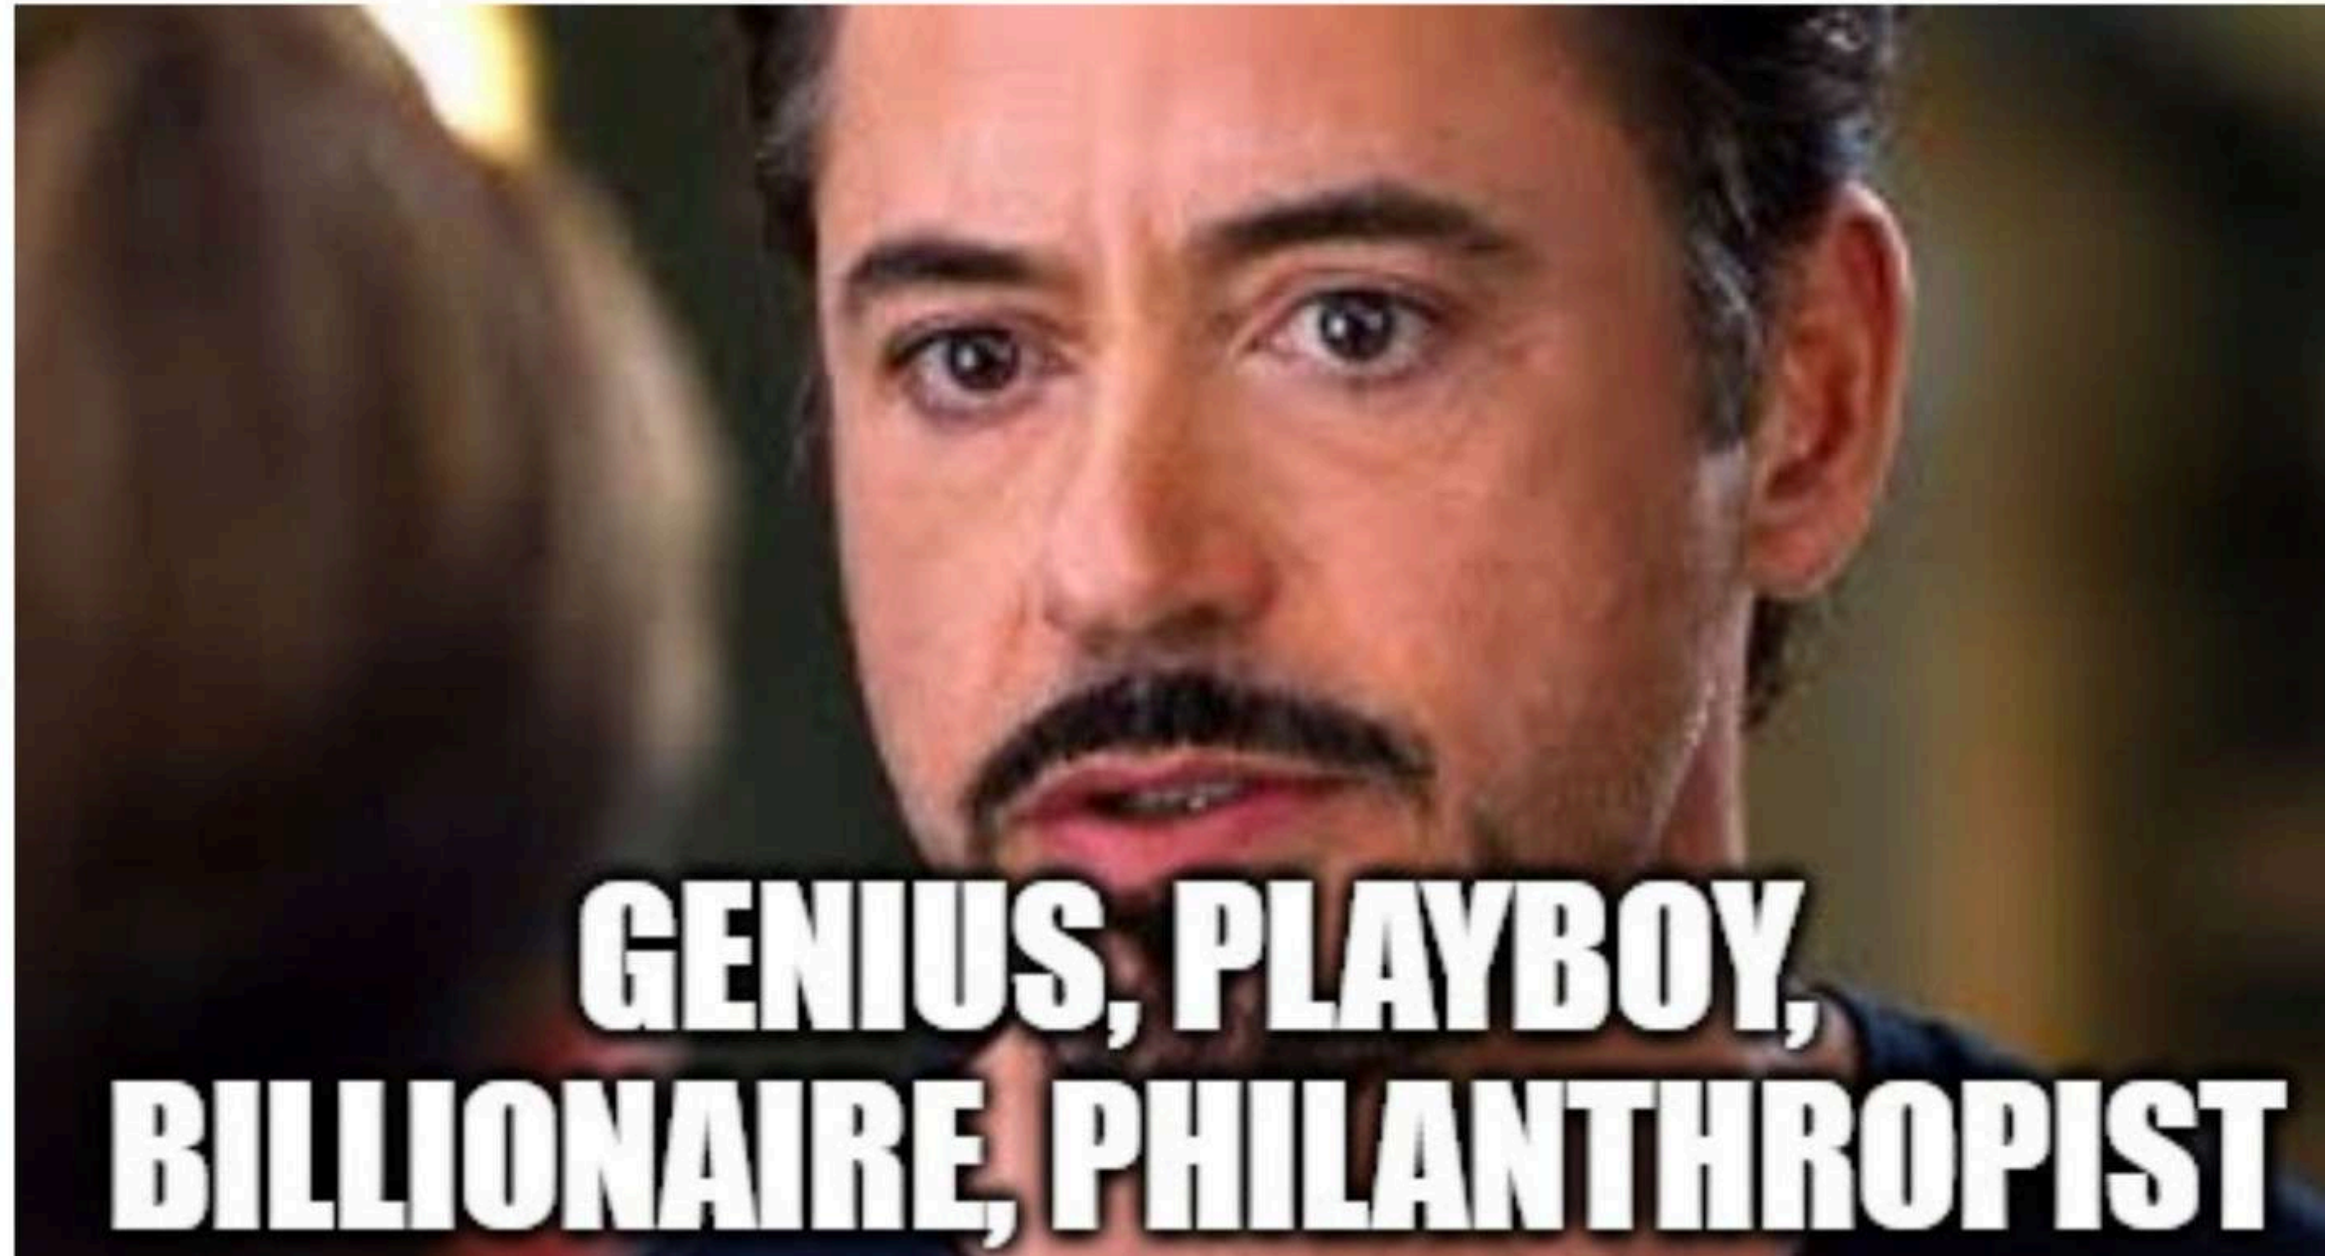

In a 2017 interview, this acting coach talked about a former project he was a part of. He was signed to train X, and said that he had to study a bit of biology for his job. Amylase are digestive enzymes, and begin to decompose whenever applied on dry skin.

As a result, the person he was coaching developed a certain habit, because his prosthetics continuously kept slipping off whenever he spoke. Eventually, this habit was incorporated into his character.

ID X and the Habit ?

JOKER(HEATH LEDGER)
KEEP LICKING HIS LIPS

Pepsi Blue was launched internationally in 2002 to compete with CocaCola's Vanilla version.

But in India, its launch in 2003 was smartly timed with an event owing to its colour, with hopes of generating a patriotic feeling amongst people.

After brief popularity, it gradually was rejected because as per some analysts, it resembled an inedible household item.

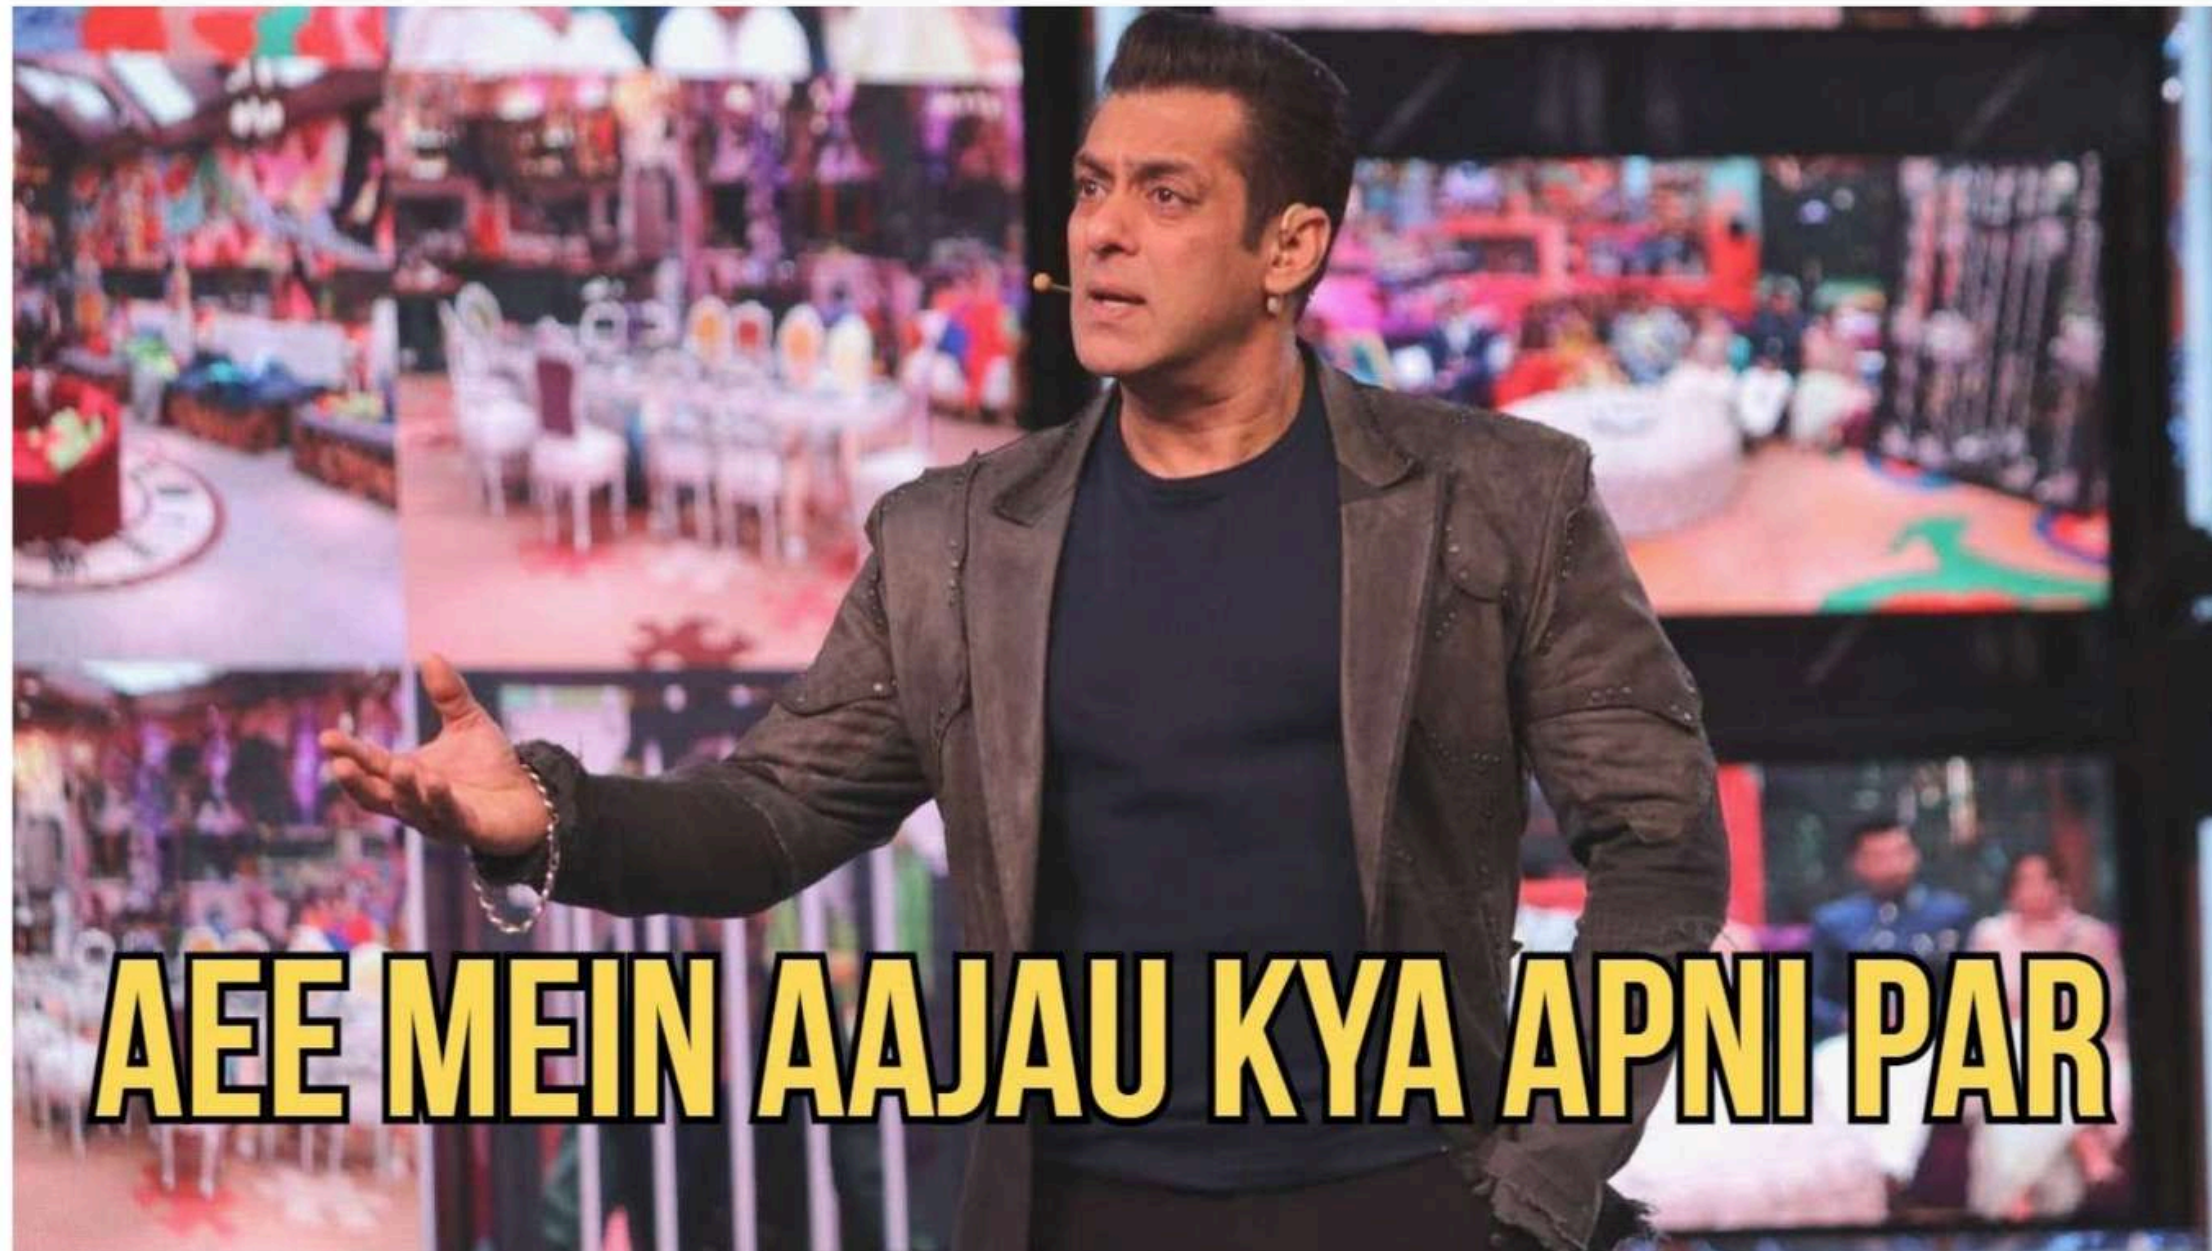

1. What event was used as its launching window in India?

2. What household item was it said to be similar?

Whenever students try to get friendly with the teachers,

***Le teachers:**

2003 CRICKET ODI WORLD CUP KEROSENE

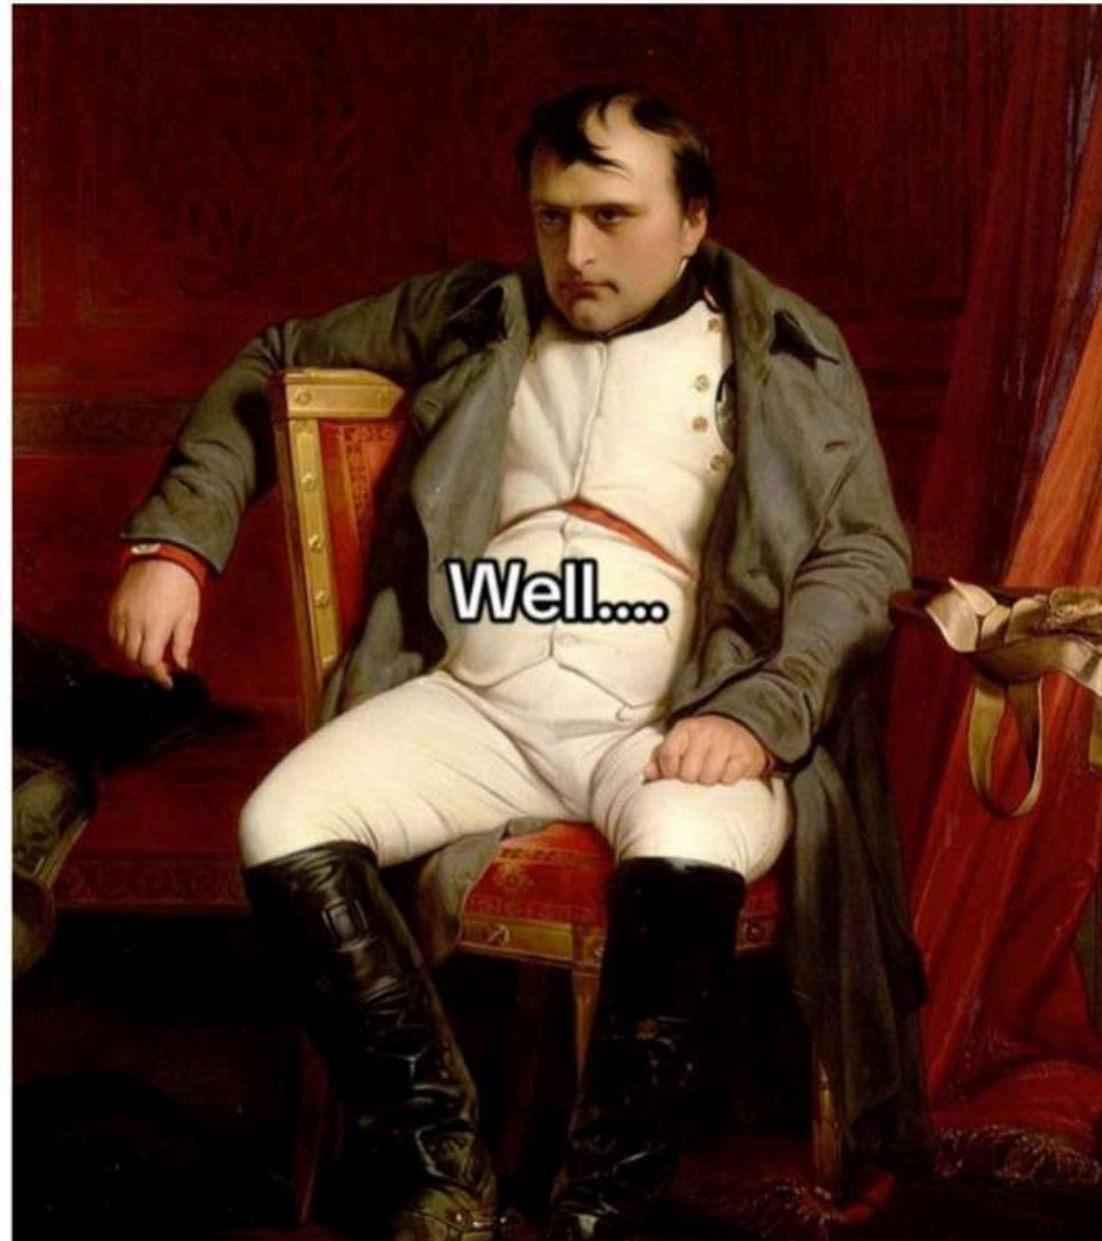

Though not primarily known as an explosive batsman, X created history by setting the record for the most sixes in a Test innings.

He smashed 12 sixes while scoring an unbeaten 257* against Zimbabwe national cricket team in 1996.

Remarkably, the record has remained unbeaten for nearly 24 years, with four other batsmen later managing 11 sixes but failing to surpass it.

Name the Claim to Fame Cricketer?

WASIM AKRAM

In 2006, United Spirits Limited introduced an innovation in Karnataka's liquor market that changed the industry.

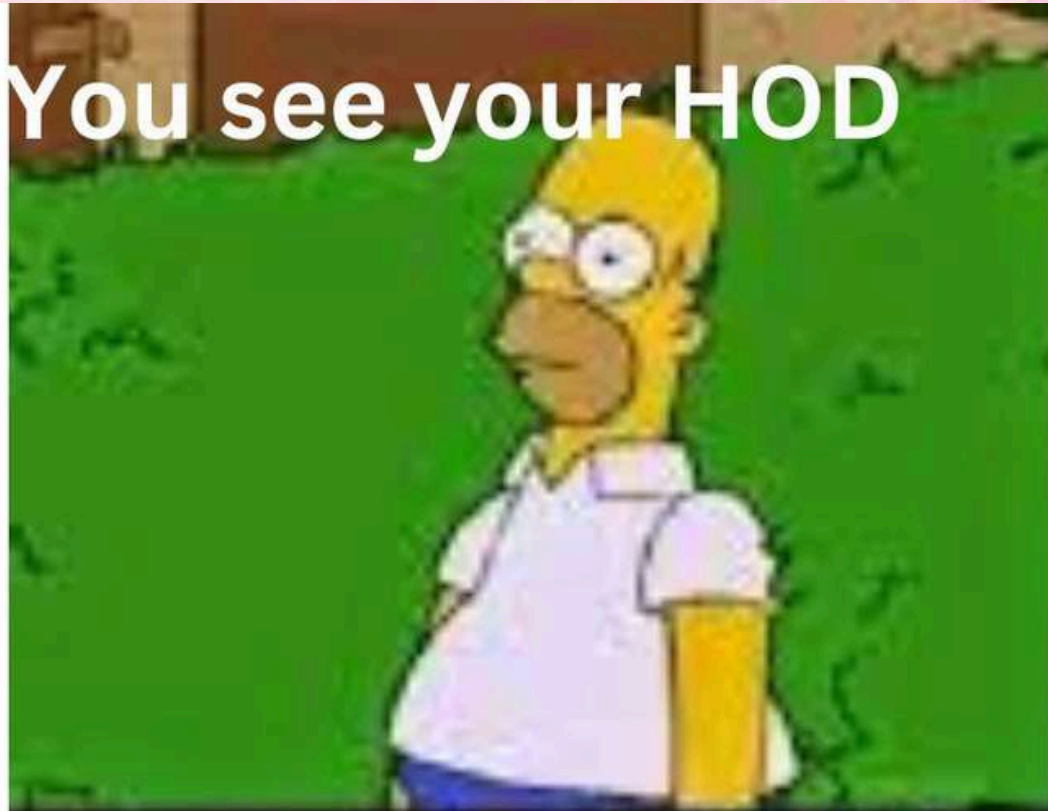

The company replaced a traditional packaging component with a much cheaper alternative costing less than half as much. Besides lowering costs, the move helped prevent adulteration, reduced spillage, and made liquor more convenient for consumers.

However, many premium brands avoided adopting it because it was believed to hurt brand perception and make alcohol appear less sophisticated.

Still, by 2015 the practice had expanded rapidly and was used for more than 35% of hard liquor sales in Karnataka.

What innovation was introduced by USL?

ROCK, PAPER & SCISSORS

Deepak Mohoni, an IIT Kanpur and IIM Ahmedabad graduate, once ran a computer graphics company. A senior journalist approached him with a request to create technical charts for articles related to companies and stock markets. While writing for publications such as The Economic Times and Business World in 1989, he claimed to have coined a now extremely popular financial term in India. The word was a portmanteau formed from two words and later became a staple of Indian financial vocabulary. Identify the term?

SENSEX

A popular belief claims that in June 1889, chef Raffaele Esposito created dish X for Savoy, Queen of Italy. Its ingredients supposedly represented the colours of the Italian flag.

However, historians later discovered that a similar dish already existed in Naples. In 1849, Emanuele Rocco described several toppings linked with X and noted that one version was arranged like a flower.

This may be the true origin of the name X, since the word means “daisy”.

Identify X?

MARGHERITA PIZZA

Flights from Hong Kong to New York City usually cost over \$2500, even when booked well in advance.

However, in May 2020, KAYAK listed tickets for the same route at under \$200 on a particular airline, surprising travelers everywhere.

On closer inspection, users discovered something unusual about these flights which, along with the journey taking nearly seven hours longer than regular flights, explained the massive discount.

What's special about these flights?

My friend after 1 bhang goli:

WUHAN AS CONNECTING AIRPOT

In the film, Vince, the husband of the X, relays a story of how, when live cod were shipped to Asia from North America, the fish's inactivity in their tanks resulted in only mushy flesh reaching the destination. However, fishermen found that putting X in the tanks with the cod kept them active, and thus ensured the quality of the fish. Vince then states that his wife Angela acts as a X, keeping the lives of those around her interesting. The title of the film is based on this dialogue, and it is where the term "to X" comes from.

Identify X?

GALAXY SCENES:

CATFISH

Her face was almost never shown on screen; audiences usually only saw her from the shoulders down.
Identify Her and Her relation with the famous character of that cartoon?

MAMMY TWO SHOES
(LANDLORD OF TOM IN TOM&JERRY)

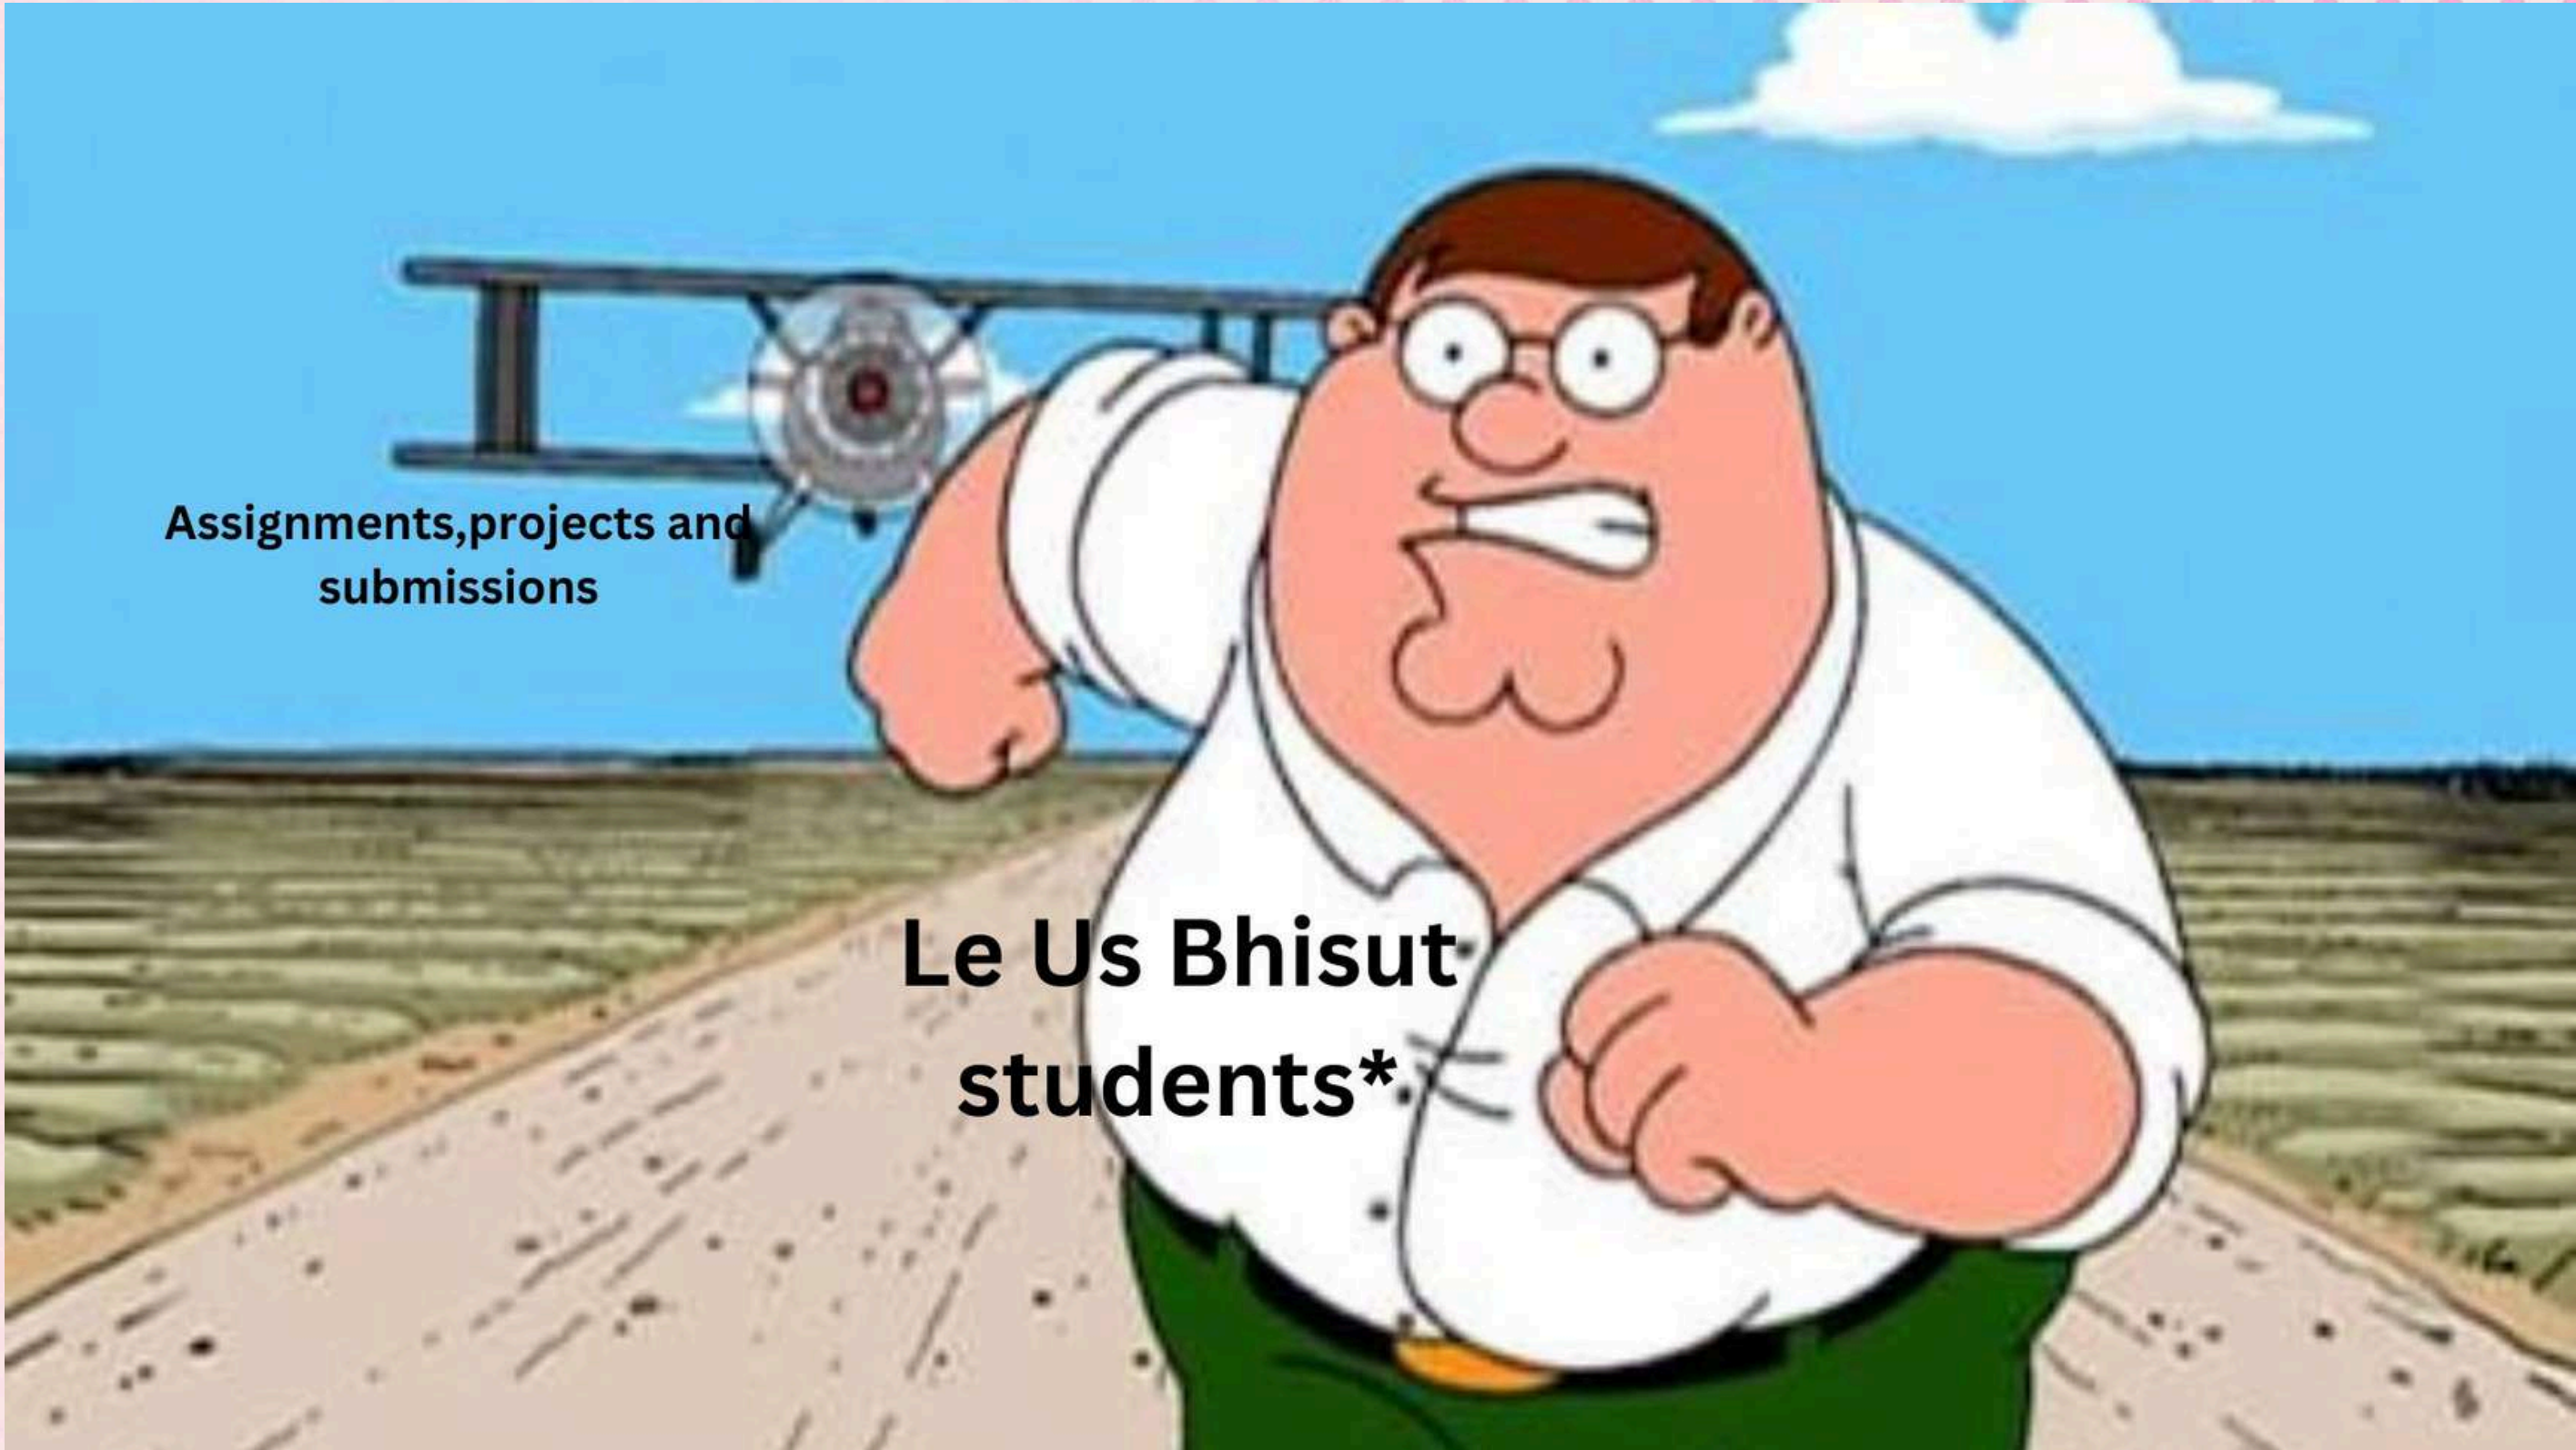

On June 26, 1974, the head of R&D at Marsh Supermarkets acted as a designated shopper during a carefully planned experiment. At checkout, he deliberately selected a multi pack of Wrigley Juicy Fruit chewing gum to demonstrate that the upcoming retail revolution could work even on a small product.

After overnight preparations by the supermarket staff, the transaction created history.

What taken first is associated with this transaction that is very commonplace nowadays during mall visits ?
